

Cloud Backup

The Rosetta Group are proud to announce their offsite/onsite backup appliance. No more sleepless nights wondering if your data is safe or trying to find a copy of that accidentally deleted file. No more manually uploading files to your online storage account hosted on a server somewhere in the world.

Our backup appliance is packed with useful features and benefits.

- Quick to setup – Minimal disruption to your business.
- Stores your data locally on multiple disks for easy access and resilience.
- Backs up your data to our online storage servers.
- Takes snapshots of your data so you can go back in time.
- Provides online access to your files.

Your data is stored securely in our UK based datacentre with backup power, fire suppression and security systems as well as 24 hour staffing. You'll be able to access your files via our easy to use web interface so you can easily get at your data, wherever you are.

You can add data to your backup server either manually, using copy and paste, or by using most backup programmes e.g. Windows backup.

To find out more about protecting your business from data loss, see our website or give us a call on 03 004 004 004.
